PROFESSIONAL SUMMARY

Full Stack Developer with hands-on experience building responsive React.js and Next.js applications and developing production-ready solutions with Node.js, Express.js, and MongoDB. Contributed to building and deploying the InstaPay Affiliate platform, a fintech affiliate solution for managing user referrals and commissions, with experience in AWS deployment, Docker, Jenkins CI/CD, and production issue resolution. Seeking to contribute strong full stack development and problem-solving skills to a collaborative software engineering team.

PROFESSIONAL EXPERIENCE

MERN Stack Developer | TechOn-Ventures Jan 2026 – Present

- Built the InstaPay Affiliate platform to manage client referrals and commissions, implementing role- and route-based access with four dedicated consoles for different user roles, including Master Agent, Sub-Agent, Operator, and Business
- Translated Figma designs into responsive, production-ready interfaces using reusable UI components, ensuring a consistent experience across desktop, tablet, and mobile.
- Integrated REST and third-party APIs using React Hooks and Zustand, and improved data loading performance and application efficiency through lazy loading, Web Vitals improvements, and bundle optimization.
- Containerized applications with Docker and automated deployment workflows using Ansible and Jenkins CI/CD pipelines and Deployed the InstaPay Affiliate platform on AWS.
- Tested, debugged, and resolved UI and functional bugs, including live production issues, to keep features reliable and stable across the application.
- Collaborated with the development team using Git and GitHub, managing feature branches, pull requests, code reviews, and merge conflicts while following established workflows and project architecture.

EDUCATION

Bachelor of Software Engineering (BSSE) at Ilma University (pursuring on weekend program)

Higher Secondary Certificate (HSC), Govt. Degree Boys Science and Commerce College 2023

Secondary School Certificate (SSC), The Tayaba-Faiz School 2021

TECHNICAL SKILLS

Frontend: JavaScript, TypeScript, React.js, Next.js, TanStack Query, Redux, Zustand, Tailwind CSS, Material-UI, Shadcn-ui

Backend: Node.js, Express.js, REST APIs, JWT Authentication

Database: MongoDB

DevOps / Cloud: Docker, Jenkins, Ansible, CI/CD, Aws

Tools / Other: Git, GitHub, Postman, Cloudinary, Nodemailer, Multer, Scalekit, Google Gemini API (Google AI Studio), AI Integration & AI-Assisted Development, Testing

PROJECTS

Support AI – Multi-Tenant AI Chatbot SaaS Platform

Live Demo: https://support-ai-rose.vercel.app/

Next.js (App Router), TypeScript, MongoDB, Scalekit, Google Gemini API, Vercel

- Built a multi-tenant SaaS platform that lets businesses create an AI-powered customer support chatbot using the Google Gemini API and embed it on any website with a single script tag.
- Designed the multi-tenant architecture with Scalekit for authentication and organization management, stored chat history and per-tenant widget configurations in MongoDB, and deployed the platform on Vercel.

E-Kart – Full Stack E-Commerce Platform

Live Demo: https://ekart-frontend-ug4u.onrender.com/

React.js, Redux, Tailwind CSS, Node.js, Express.js, MongoDB, JWT, Multer, Cloudinary, Nodemailer

- Built a full stack e-commerce platform with a customer storefront and admin dashboard covering product catalog, shopping cart, and order management, backed by MongoDB schemas and RESTful APIs.
- Implemented JWT authentication with role-based access control, and integrated Cloudinary for image uploads and Nodemailer for order-confirmation emails.

Eventix – Event Management Platform

Live Demo: https://event-booking-1-82p5.onrender.com/

React.js, Node.js, Express.js, MongoDB, JWT, REST APIs

- Built a full stack event booking platform with JWT authentication, email OTP verification, and role-based access control separating admin and attendee permissions.
- Developed secure REST APIs and an admin dashboard for managing events and bookings.
